

Acknowledgement with my work

Utilization of the Zero point energy of the electromagnetic waves of the quantum-vacuum:

My special thanks go to my wife, Dr. rer. nat. O. Turtur, who supported me with endless mental and moral understanding, giving me the power to process and to withstand all the exertions of the hard work on which the scientific work is based, which I described in this article. She also supported me with practical help as far as even possible. I also want to mention her economical and frugal lifestyle, by which she gave me the possibility to take a part of our private income to sponsor my work.

My thanks also go to Dr. W. Guilherme Kürten Ihlenfeld and to Dr. Frank Lienesch, as well as to Prof. W. Eberhardt for technical aid, by which they helped me essentially with regard to the practical realization of my work. The greatest help came from Dr. Wolfram Knapp, with whom we cooperated not only scientifically but also personally and mentally in a brilliant way. Without him, I would never have succeeded to do the experimental part of the work presented here.
